2021 NAAB Directors .................................................................................................................... 18
FROM THE PRESIDENT AND THE EXECUTIVE DIRECTOR OF NAAB

It is our pleasure and honor to transmit to you, on behalf of the directors and staff of the National Architectural Accrediting Board, Inc. (NAAB), the 2021 Report on Architecture Education at Minority-Serving Institutions.

In the higher education system of the United States, minority-serving institutions (MSIs) make up a category of educational establishments (federally recognized Title IV colleges and universities) based on enrollment criteria (typically the percentage of enrolled minorities at a particular school). Such schools are eligible for federal funding under Title III of the Higher Education Act of 1965.

The seven categories of MSIs within Title IV are as follows:

1. **Alaska Native- or Native Hawaiian Serving Institutions**: Postsecondary institutions that serve an undergraduate population that is both low income and in which Alaska Native students constitute at least 20 percent or Hawaiian Native students constitute 10 percent of the total undergraduate enrollment.

2. **Asian American and Native American Pacific Islander-Serving Institutions**: Postsecondary institutions that serve an undergraduate population that is both low income and in which Asian Americans or Native American Pacific Islander students constitute at least 10 percent of the total undergraduate enrollment.

3. **Historically Black Colleges and Universities (HBCUs)**: According to the Higher Education Act of 1965, as amended, HBCUs are defined as any historically black college or university established before 1964 whose principal mission was, and is, the education of black Americans.

4. **Hispanic-Serving Institutions**: Postsecondary institutions that serve an undergraduate population that is both low income and in which Hispanic students constitute at least 25 percent of the total undergraduate enrollment.

5. **Native American-Serving Non-Tribal Institutions**: Postsecondary institutions that serve an undergraduate population that is both low income and in which Native American students constitute at least 10 percent of the total undergraduate enrollment.

6. **Predominantly Black Institutions**: Postsecondary institutions (non-HBCU) that serve an undergraduate population that is both low income and in which Black students constitute at least 40 percent of the total undergraduate enrollment.

7. **Tribal Colleges and Universities**: Postsecondary institutions that are formally controlled, chartered, or sanctioned by the governing body of a Native American tribe.

ANNUAL STATISTICAL REPORT

Overview

NAAB launched its online Annual Report Submission site in 2008. The aggregate results of the web-based questionnaire are included in this report.

The annual statistical report (ASR) captures information on both the institution in which an architecture program resides and the program itself. The statistical report consists of seven sections: (1) institutional characteristics; (2) NAAB-accredited architecture programs; (3) tuition, fees, and financial support for students; (4) student characteristics; (5) degrees awarded; (6) resources for students and learning; and (7) human resources.

The definitions used in the statistical report are based on the glossary of terms used by the Integrated Postsecondary Education Data System (IPEDS). IPEDS is the “core postsecondary data collection program” for the National Center for Education Statistics. Data are collected from all primary providers of postsecondary education in the United States in areas including enrollments, program completions, graduation rates, faculty, staff, finances, institutional prices, and student financial aid. Much of the institutional information requested in the ASR corresponds to reports submitted by institutions to IPEDS each fall.

The data presented in this special report were collected in fall 2020 and cover the 2020–21 academic year.

General Information

Twenty-nine institutions classified as MSIs offer a total of 33 NAAB-accredited programs. Six offer both the B. Arch. and the M. Arch. Sixteen offer an M. Arch. only, six offer a B. Arch. only, and one offers a D. Arch only.

Twenty of these institutions also offer a nonaccredited preprofessional degree in architecture.

Twenty-one institutions are publicly supported and eight are privately supported.

MISSION, VISION, AND VALUES OF NAAB

From the 1940 Founding Agreement:

“The...societies creating this accrediting board, here record their intent not to create conditions, nor to have conditions created, that will tend toward standardization of educational philosophies or practices, but rather to create and maintain conditions that will encourage the development of practices suited to the conditions which are special to the individual school. The accrediting board must be guided by this intent.”

Since 1975, the NAAB Conditions for Accreditation have emphasized self-assessment and student performance as central elements of the NAAB model. The directors have maintained their commitment to both of these as core tenets of NAAB’s criteria and procedures.

MISSION

The NAAB develops and maintains an accreditation system in professional degree education that enhances the value, relevance, and effectiveness of the profession of architecture.

VISION

The NAAB advances educational quality assurance standards and processes that anticipate the needs of academic programs, the profession, and society, to promote a better built environment.

CORE VALUES

The NAAB aspires to follow four core values in the way it approaches its work and mission:

1. **Commitment to Excellence**: Foster a culture of continual improvement that seeks positive organizational transformation and responds to external change.

2. **Diversity and Inclusion**: Celebrate unique institutional perspectives and ensure the inclusion of diverse populations to enrich the learning environment.

3. **Effective Communication**: Articulate the value of an accredited architecture education to students, the profession, and the communities architects serve.

4. **Spirit of Collaboration**: Promote transparency and collateral cooperation in the shared responsibility of preparing graduates for professional practice.
